University

Dr Samuel Chawne

[Read More](#)

Dr Samuel Chawner is an experienced researcher in the field of mental health in 22q11.2 Deletion Syndrome. With extensive experience conducting longitudinal cognitive and mental health research, Dr Chawner's work focuses on understanding the complex interplay between neurodevelopment, and mental health outcomes in individuals with 22q11.2 Deletion Syndrome. His work has extended into the field of sleep research and early development, with a focus on identifying early markers of mental health problems. Dr Chawner is also passionate about public engagement and is a frequent speaker at conferences, workshops, aimed at clinicians, researchers, and families affected by 22q11.2 Deletion Syndrome.
